

RPSD CAPSTONE

UC San Diego Data Science Kickoff

From first search to trust at scale

Agenda

Introductions

Meet the RPSD team and student cohort

About RPSD

History, mission, scale, and UCSD relationship

Onboarding

Training completion and NDA

Project outline

Goals, use cases, and data sources

Expectations

Resources, cadence, and next steps

RPSD at a Glance

A physician-led fertility center with deep San Diego roots

1998

First egg retrieval

~13,000 ft²

Clinical, laboratory, and surgical footprint

~800

Egg retrievals per year

7 days

Open every day of the year

Our Center

- Fully accredited Embryology, Andrology, and Endocrinology laboratories
- Fully accredited Ambulatory Surgery Center
- Comprehensive fertility treatment and preservation services

Physician-led care

All ultrasounds and office procedures, including office hysteroscopies, are performed by a physician.

RPSD's Mission & Vision

MISSION

To provide the best patient care possible.

VISION

To establish a premier Center of Excellence that integrates the strengths of RPSD and UCSD, advancing fertility care through innovation, exceptional patient outcomes, and training future leaders in reproductive medicine.

Tradition of Excellence

- 2001: First PGD live birth in San Diego County
- 2011: First live birth from egg freezing in San Diego County
- 10,000+ IVF cycles since RPSD's inception
- Center of Excellence designation from Optum / UnitedHealthcare

Why it matters for this capstone

RPSD combines a longstanding clinical program with an active commitment to innovation, data strategy, and patient access.

RPSD + UC San Diego

A longstanding academic and clinical affiliation

- Service and Teaching Agreement with UC San Diego
- Joint IVF Program with the Division of REI
- Training for REI fellows and residents
- Weekly academic physician meetings and monthly journal club
- Oncofertility program and research collaboration

CAPSTONE CONTEXT

**This project
extends the
RPSD-UCSD
relationship into
applied data
science and AI.**

The aim is a practical,
bounded solution supporting
the fertility patient journey
and online reputation
management.

Introductions

RPSD TEAM

Gabe

Tamar

Brooke

Let's hear from you

- What motivated you to be part of this project?
- What are you excited to learn?
- What are your hobbies or interests?
- What are your future plans?

Onboarding

1 Training completion

2 NDA completion

**3 In-person
orientation next
week**

Discussion

- What remains incomplete, and what support is needed?
- Confirm expectations for the in-person session.

Project Outline

Automated reputation management for the fertility patient journey

GOAL

Explore data-driven marketing systems and AI agents that can support online reputation management at scale.

Potential Data Sources

Web scraping

Chatrooms and forums

Review pages

Competitor websites

Expectations and Next Steps

- Largely student-driven project
 - This is a chance to work on something larger than most coursework-based projects
 - Own the analysis, shape the questions, and bring methods expertise.
 - On and off-campus resources?
 - We would love to know what students have access to here
- RPSD to provide context, data-source guidance, brainstorming, and project direction.
- Meeting cadence
 - Thursdays 3:00?
